Washington State Treasurer
1984 Annual Financial Report

Robert S. O'Brien
State Treasurer

Cover: Puget Sound. Local sailing enthusiasts enjoy a late afternoon sail in light breezes on Shilshole Bay near Seattle. With hundreds of marinas, thousands of boats, and over 2,200 miles of shoreline, Puget Sound is an ideal boating and recreation setting. Numerous ports on Puget Sound connect the Pacific Northwest with its trading partners in the Far East and Pacific Rim countries. Puget Sound is in Western Washington and extends from the Strait of Juan de Fuca to the north to the state capitol, Olympia, to the south.

STATE OF WASHINGTON
OFFICE OF STATE TREASURER
OLYMPIA

Robert S. O'Brien
State Treasurer

The Honorable John Spellman
Governor of the State of
Washington and
Honorable Members of the
Washington State Legislature

In accordance with RCW 43.08.010 and RCW 43.33.130, I respectfully submit to you and the people of Washington this report covering the operations of the Office of the State Treasurer and the State Finance Committee for the period July 1, 1983 through June 30, 1984.

Fiscal 1984 was a year of solid economic recovery for the State of Washington after two years of economic downturn. The cash flow position of the General Fund, however, had not as yet seen the full measure of the positive effects of certain long-term legislative actions. These will be more in evidence at the end of the 1983-85 biennium. As a result, it was again necessary to issue short-term revenue anticipation notes ($200 million) in August 1983.

During Fiscal 1984 a total of $439,083,310 General Obligation Bonds, rated AA– by Standard and Poor's Corporation and A by Moody's Investors Service, were sold through competitive bid in three separate issues.

The Treasury's cash position in Fiscal 1984, with the aid of $200 million in outside short-term financing, improved over the previous year, with the average portfolio balance in the Treasurer's Cash Management Account [excluding long-term retirement and trust funds] increasing 32 percent from $625 million to nearly $827 million. Treasury earnings were nearly $73 million continuing to constitute an important non-tax revenue source to the state.

Respectfully submitted,

ROBERT S. O'BRIEN
STATE TREASURER

YEAR AT A GLANCE
FISCAL 1984

General Fund Balance, Fiscal 1984 Average	$ 70,858,557–

OFFICE OF STATE TREASURER

DUTIES

The State Treasurer is a constitutional officer elected every four years and is third in line to the Office of Governor. The Treasurer is charged with the responsibility of formulating and executing policy for the management of the State Treasury and related financial resources of the State of Washington.

As the Fiscal Officer of the State of Washington, the State Treasurer:

- manages, accounts for, monitors, and disburses all funds and accounts of the State Treasury;
- is responsible for the physical safekeeping and interest on all state investments;
- accounts for and makes payments of interest and principal on all state bonded indebtedness;
- administers state and federal revenues to be distributed to counties, cities, towns, and other taxing districts of the state;
- monitors the cash requirements and cash position of all treasury funds, insuring that temporary balances are immediately invested at the highest yield consistent with safety and liquidity;
- services the accounting, cash flow, and investment requirements of trust funds which are not treasury funds, but are in the custody of the State Treasurer;
- identifies and recommends to other state agencies the use of new cash management techniques which will increase the collections and earnings potential of investible balances;
- maintains a statewide revenue collection system for the purpose of expediting the deposit of state funds into the Treasury;
- prepares monthly and annual financial reports describing the condition of the Treasury;
- administers the Public Deposit Protection Commission which insures the protection of all public funds in the State of Washington; and
- administers the State Finance Committee which manages the issuance of all state bonded indebtedness.

The State Treasurer is also designated chairman of two agencies concerned with fiscal management: the State Finance Committee and the Public Deposit Protection Commission (PDPC). The State Finance Committee (Governor, Lieutenant Governor, members) has the responsibility to issue State of Washington bonds. The State Treasurer's Office provides administrative support to the State Finance Committee. The Public Deposit Protection Commission (same membership as State Finance Committee) administers a pooled collateral system designed to insure all public funds (state, county, city, other) on deposit in qualified depositaries throughout the state. The State Treasurer's Office provides administrative support to the PDPC.

ORGANIZATION

As noted in the accompanying organizational chart, the State Treasurer's Office is composed of six divisions: Cash Management, Treasury Accounting, Administration/Operations, Information Systems, the Public Deposit Protection Commission, and the State Finance Committee.

Cash Management

The Cash Management Division includes the following sections:

Cash Flow: Treasury Funds. The cash flow section accounts for and monitors the daily cash position of all Treasury funds and invests surplus balances. An average daily invested balance of nearly $827 million provided almost $73 million in earnings to the state during Fiscal 1984. This section monitors the level and computation of compensating balances necessary to recompense the state's single concentration bank for workload associated with receipts and disbursements. Pursuant to statute (RCW 43.86A), the State Treasurer also administers a Time Deposit Investment Program. This program, separate and apart from daily cash flow decisions, authorizes the purchase of certificates of deposit with all Washington financial institutions.

Cash Flow: Trust Funds. Statutes require the State Treasurer to act as custodian of 32 trust funds with aggregate balances of $49.8 million and annual receipts exceeding $278 million. Additionally, this section administers the State Treasurer's Trust Fund, a consolidation of 31 trust funds which are pooled for purposes of cash management. The processing functions performed by this section parallel the accounting services provided for Treasury funds.

Distributions to Local Government. State and federal laws provide that the State Treasurer's Office make monthly, quarterly, and annual distributions to 325 units of local government, from five sources of federal revenue, and 23 sources of state revenue. The tax distribution section is responsible for statute analysis, formula computation, electronic funds transfer processing, the preparation and mailing of warrants, and the dissemination of statistical data to the State Auditor and the Legislature.

Local Deposits. The State Treasurer maintains a statewide collection system designed to expedite the deposit and transmission of locally generated state funds (e.g., liquor sales receipts and cigarette tax stamp proceeds) into the State Treasury. At present, a network of 63 banks serve as account depositaries for local offices and stores of eleven major state agencies using the system. The deposit of receipts into these local bank accounts are quickly transferred to the state's concentration account for consolidation into daily cash flow activities. This section also verifies cash deposit accounting records against deposit information received and processed by the participating agencies.

Investment Accounting. This section is responsible for the physical safekeeping of, accounting for, and collection of interest on all state investments, to include investment transactions initiated by both the State Investment Board and the State Treasurer's Office. The State Investment Board staff executes investment transactions for 18 funds in the State Treasury having independent investment authority, including six retirement funds, three enterprise funds, six non-expendable trust funds, and three miscellaneous funds. The State Treasurer's staff executes short-term investment transactions for the pooled cash management account and four miscellaneous funds. The combined portfolio of all funds accounted for by this section, as of June 30, 1984, exceeded $8.6 billion, with asset growth of $132 million per month. During Fiscal 1984, total income and capital gain collections on funds administered by both the State Treasurer's Office and the State Investment Board reached $943 million. Securities held by these funds include U.S. Treasury and Government Agency issues, public and corporate bonds, mortgages and mortgage-backed securities, equities, commercial paper, bankers' acceptances, and certificates of deposit.

Treasury Accounting

In conjunction with individual state agencies and the Office of Financial Management, this division is responsible for maintaining and verifying the final books of record involving all funds and accounts in the State Treasury. The Treasury is composed of 238 separate funds and accounts, each constituted by statute and designated as a separate accounting entity. Within each separate fund and account, required accounting records include receipts, issues, transfers, and outstanding warrant data. During Fiscal 1984, total annual receipts of the Treasury were approximately $22.9 billion.

Administration/Operations

This division oversees the planning, development, and implementation of the State Treasurer's budget. It prepares allotment requests and monitors the agency's revenue and disbursement patterns against approved budgetary limitations and allotment controls. Operations personnel insure that administrative and logistical requirements, to include equipment, materials, and supplies, etc., considered essential to the efficient operation of the office are available and operational.

This division also coordinates a multitude of activities relating to office personnel requirements and works closely with the Department of Personnel staff and Personnel/Payroll system. Specifically, this function includes: the recruiting and employment of new personnel; the retention and upgrading of present employees; compensation planning; providing for appropriate educational opportunities; and coordination of interagency training and affirmative action programs.

Information Systems

The Information Systems Division is comprised of Systems Software, Computer Operations and Systems and Programming sections. The division provides data processing, office automation and data communications services for the entire office and other user agencies.

The Systems and Programming section is responsible for the development, enhancement and maintenance of the Warrant Processing, Treasury Accounting, Investment Accounting, Collateral, Bond Debt and Tax Distribution program application systems. This section is presently developing an on-line Investment Accounting System. When implemented, this system will eliminate many of the manual procedures currently used by the Investment Section.

Our current in-house computer configuration includes an IBM 4331-K2 medium-sized computer system, Recognition Equipment TRACE II Check Processing System, and a network of CRT's, word processors and personal computers. We also utilize certain services at the Washington Data Processing Service Center.

Public Deposit Protection Commission

Since 1969, administrative support to the Public Deposit Protection Commission has been provided by the State Treasurer's Office. The administration of this pooled collateral program requires quarterly reports of condition from all commercial banks and thrift institutions serving as public depositaries, the maintenance of trust agreements with third-party financial institutions, and communication with over 800 local treasurers and other custodians of public funds regarding deposit limitations and other matters relative to the provisions of the Public Deposit Protection Act.

State Finance Committee

The State Finance Committee is composed of the Governor, Lieutenant Governor, and State Treasurer, the latter being designated by law as chairman. Pursuant to Chapter 43.33 RCW the Office of the State Treasurer provides administrative support to the Committee. As authorized by statute, the State Finance Committee supervises and controls the issuance of all state bonds. A Deputy State Treasurer acts as recording officer for the Committee and is responsible for the administration of the official duties in accordance with prescribed policies of the Committee.

Bond Debt Accounting. In conjunction with the fiscal agent bank(s) designated by the State Finance Committee, the Treasurer's Office is responsible for the payment of all bonds and coupons. Debt service paid in Fiscal 1984 was approximately $237.973 million. As of June 30, 1984, outstanding bonds of the State of Washington, including refunding issues, totaled $2.379 billion.

Forecasting, Accounting and Portfolio Management

Since 1977, the Treasurer's Office has utilized a time share computer system to project, account for, and manage the state's short-term revenues. This system continues to be a significant focal point of the State Treasurer's cash management/investment procedures. Additionally, the State Treasurer's Office utilizes the in-house processing capabilities of an IBM 4331 computer. This system serves the State Treasurer's Office in three environments: as a stand-alone computer, as a distributed processor, and for remote job entry at one of the state's major data processing service centers.

Mobilization of State Revenue

The mobilization of funds plays an important role in the State Treasurer's cash management plan. Approximately 70 to 80 percent of all major state revenues are currently deposited through lock box remittance systems. Federal government agencies increasingly are turning to direct deposit procedures in lieu of checks in the allocation of funds to the state. All property tax funds collected by county treasurers for the state are deposited by wire transfer directly into the State Treasurer's concentration account.

In addition, all tuition and operating fees from higher education institutions, all sales receipts from the Liquor Control Board and various deposits from cities and towns are electronically transmitted to the State Treasurer.

Disbursement

Warrants continue to be the major instrument of state disbursement. As a general rule, disbursements controlled by the Treasurer's Office are made in accordance with the most optimum cash flow schedule available to the state. It should be noted, however, that state agencies normally control their own disbursement schedule for vendor payments, while state or federal laws set precise timetables for the payment of salaries, distributions to local governments, welfare payments, etc.

Increasingly, however, the use of warrants is being supplanted with various direct deposit procedures. These deposit functions, closely paralleling those of the financial community, are currently in a constant state of change. The initiative is toward "paperless entry" transactions and the increasing use of electronic funds transfer in moving both monetary credits and supporting accounting data. All distributions of state collected funds to local government (cities, counties, special districts) are made by direct deposit through the Northwest Automated Clearing House in Seattle. Additionally, of the payments to retirees among the state's four retirement systems, over 35,000 or 50 percent receive monthly payments by direct deposit.

Beginning in Fiscal 1982, direct deposit of payroll was made available to all state employees. Early estimates for this program projected an annual growth rate for participation of five percent. The actual participation, however, showed a significant increase from 5,500 employees (or 16%) in Fiscal 1982 to 14,500 employees (or 35%) in Fiscal 1984.

In ensuing years, the state's payment process will continue to move from a *warrant* processing to a *direct* or electronic processing mode. In addition to those systems already in place, the State Treasurer's Office anticipates upgrading other payment systems.

I. CASH MANAGEMENT

The State's Concentration Bank

Fiscal 1984 saw the continued use of Seattle-First National Bank as the state's single concentration bank under a two-year contract. Bank selection is by a competitive bid process open to those financial institutions in the state which are capable of providing the magnitude of services required by the State Treasurer.

The state "pays" for bank services with compensating balances. A formula has been developed which will produce earnings commensurate with the level of services provided. The formula continues to be that used by the Treasurer's Office in the last several years.

$$CB = \frac{SC}{e}(1 + r) + \frac{f \cdot TF}{DM} + ADJ$$

where:

CB	Compensating Balance
SC	Service Charges
e	Earnings Rate (26-week Treasury Bill tax coupon equivalent rate)
r	Reserve Requirement
f	Float Factor
TF	Treasurer's Deposits Subject to Float
DM	Number of Days in Month
ADJ	Adjustment Factor

Compensating Balance
Fiscal 1984

	"Service" Balance Required	"Float" Balance Required (Uncollected Funds)	Total Compensating Balance Required
July-Sept. 1983	$1,099,651	$5,806,172	$6,905,823
Oct.-Dec. 1983	$1,092,367	$5,637,079	$6,729,446
Jan.-Mar. 1984	$1,026,204	$5,384,371	$6,410,575
Apr.-June 1984	$1,161,197	$5,166,277	$6,327,474

Compensating Balance
(In Millions)

Fiscal Year	Average Balance
1984	$ 6.8
1983	$ 6.0
1982	$ 6.0

TREASURER'S PROGRAM REVIEW: FISCAL 1984

I. CASH MANAGEMENT

Background

Statutes provide that excess cash balances in the State Treasury may be invested as the State Treasurer deems advisable. These temporarily surplus funds consist of those revenues which support general governmental operations and are derived from taxes, licenses, fees, federal grants, etc. Specifically excluded from the State Treasurer's Cash Management Account are retirement and pension funds, long-term trust funds, and certain dedicated permanent funds.

Daily investment of these short-term funds by the Treasurer's staff is limited by statute to U.S. Treasury and agency securities (more precisely, obligations of any government sponsored corporation eligible for collateral purposes by the Federal Reserve), repurchase agreements (repo's), Washington bank certificates of deposit (CD's), and bankers' acceptances.

Investment Guidelines

Investment decisions made by this office conform to the prudent man rule, incorporating the traditional considerations of safety of principal, liquidity and yield. The foremost consideration of every public fund trustee, safety of principal, is adequately assured by specific investment authority granted by the Legislature.

The second objective of the Treasurer's investment posture focuses on the state's cash flow position. Vagaries in the daily revenue and expenditure curves demand constant attention to assure adequate liquidity in a portfolio of this kind. In an effort to precisely determine our future cash needs, this office uses a computer-based system.

Yield is the third cornerstone of our investment program. After liquidity requirements and maturity ranges have been defined for new purchases, each investment transaction is finalized on the basis of highest yield through a competitive bid process. For such transactions, bids are sought from large financial institutions and investment firms in the state and throughout the country. Such financial institutions and investment firms must have a sound capital position and be large enough to aggressively compete in the government and money market arenas.

Another element of our investment program includes the allocation of a portion of the Cash Management Account to a formal Time Deposit Investment Program with financial institutions in this state (see Financial Statements—Cash Management Portfolio). This Certificate of Deposit program is statutorily based and is distinct from daily investment transactions. This program has two objectives: primarily, investments in local bank CD's must provide a competitive return to the state; and secondarily, locally generated tax dollars are invested in banks throughout the state to help meet local loan demands, thereby increasing economic activity statewide.

Investment Activity

In accordance with these guidelines, a summary of the State Treasurer's investment activities of the Cash Management Account for Fiscal 1984 is presented below.

- The average portfolio balance increased by $202 million, or 32.3 percent from approximately $625 million in Fiscal 1983 to $827 million in Fiscal 1984.
- Of the Fiscal 1984 average invested balance ($827 million), approximately $95.1 million was invested in the Time Deposit Investment Program. Yields on these securities varied from 9.33 percent to 11.53 percent, on maturities of three months. The purchase of CD's outside this formal program, i.e., on a day-to-day basis, averaged $39.0 million.
- An additional $112.1 million of the average portfolio was invested long term, that is, maturities over one year.
- The balance of the portfolio, approximately $580.4 million, consisted of short-term maturities (less than one year). This portion of the portfolio provides the necessary liquidity for the state to meet its disbursement requirements.
- Investment purchases totaled nearly $28.8 billion in Fiscal 1984. A breakdown of these purchases by maturity and type is shown on the following page.

Summary of Results

Total earnings for Fiscal 1984 showed a 10.3 percent increase from the previous year's figure ($65.9 million compared to $72.7 million).

While the average General Fund was a deficit figure of $37.2 million for Fiscal 1984, the General Fund, combined with certain restricted accounts and funds, for earnings purposes retained a positive balance of $181.3 million. As a result, over $12.5 million in earnings was distributed to the General Fund at the close of Fiscal 1984. In addition, 20 percent of all earnings of the Treasurer's Cash Management Account are directly deposited to the General Fund upon receipt by the Treasury. Thus, the General Fund earned an additional $14.5 million (see Financial Statements—Earnings on Current Investments).

II. DISTRIBUTION OF STATE-COLLECTED REVENUES

Distribution of state collected taxes, fees, and other revenues to various local governments is a statutory responsibility of the State Treasurer's Office. There are eight allocations independent of the Treasurer's statutory distribution procedure: School Apportionment (for Superintendent of Public Instruction); Liquor Profits (for Liquor Control Board); Natural Resources Deposit Refunds (for Department of Natural Resources); Local Sales & Use Tax, Local Leasehold Excise Tax, Stadium Tax, Metro Tax, and Excess Business Inventory Tax (for Department of Revenue). These funds are combined with the State Treasurer's other distributions. Also combined with the State Treasurer's electronic transfers to counties are federal revenues for distribution (Flood Control Receipts, Taylor Grazing Receipts, Federal Forest Funds, Geothermal Receipts, and Public Law 97-99 Moneys). State collected revenues for distribution (excluding earmarked federal revenues and school apportionment) increased by $111.2 million in Fiscal 1984 ($659.3 million vs. $548.1 million). Of the $659.3 million distributed in Fiscal 1984, $453.3 million or 68.8 percent was apportioned to 266 cities and towns and 22 special districts, while $206.0 million or 31.2 percent was remitted to 39 counties (see Financial Statements — Distribution of State Collected Revenue).

School apportionment of over $1.82 billion for Fiscal 1984 accounted for 73.1 percent of all funds distributed to local governments.

	Amount Distributed		Increase or (Decrease)	
State Collected Revenue	1984	1983	Amount	Percent
Motor Vehicle Fuel Tax, Overload Fines, Refunds to Island, Pierce, Skagit, San Juan, and Whatcom Counties	$ 105,000,521.56	$ 79,816,943.36	$ 25,183,578.20	31.55%
Local Sales and Use Tax	254,889,396.31	183,252,486.03	71,636,910.28	39.09%
Liquor Profits	23,000,000.00	25,500,000.00	(2,500,000.00)	(9.80%)
Motor Vehicle Excise Tax[1]	17,673,131.97	17,149,911.92	523,220.05	3.05%
Liquor Excise Tax	9,074,668.69	9,382,049.74	(307,381.05)	(3.28%)

TREASURER'S PROGRAM REVIEW: FISCAL 1984

III. STATE FINANCE COMMITTEE

The period covering Fiscal 1984 did not reflect the dramatic decline in interest rates experienced during Fiscal 1983. There were no extreme highs or lows in rates but, rather, a band of approximately 150 basis points within which the *Bond Buyer* index fluctuated during the year. The index opened the fiscal year at 9.55 percent and closed at 10.76 percent for an over-the-year gain of 121 basis points. Among the factors influencing bond prices were the sporadic investor concern over renewed inflation, the changing supply of high grade general obligation bonds, housing bonds, and industrial revenue bonds, the strains on the domestic banking system (as demonstrated by the Continental Illinois Bank crisis), and the concern over the debt burden of less developed countries.

The state entered the 1983-85 biennium with its financial house in order. The chronic cash flow problems experienced at the beginning of the 1981-83 biennium were less in evidence in the summer of 1983. A June 30, 1983 General Fund balance of $79.8 million was achieved, a hopeful sign after the troublesome 1981-83 biennium.

As the 1983-85 biennium began, however, two events occurred which had major consequences for the state's financing program during Fiscal 1984. The first event was not of the state's making but broke upon the eve of a planned bond authorization meeting of the State Finance Committee in crisis proportions. On June 15, 1983, the State Supreme Court ruled on a petition for discretionary review that 28 Washington public utility districts and cities and towns, which executed Participants' Agreements for Washington Public Power Supply System Projects (WPPSS) 4 and 5, lacked the statutory authority to enter into such agreements and therefore, those agreements were *ultra vires*. This set the stage for one of the largest municipal bond defaults in United States history.

The effect of this decision was chaos in the financial markets for any trades of securities of the supply system, the state, and any municipalities of the state. Although most knowledgeable investors and underwriters distinguished between the credit of the supply system and that of the state, the psychology of the market made it all but impossible, for a time, for any Washington State name to gain access to the market at a reasonable interest rate.

After reviewing the situation with its advisors and representatives of the local and national financial community, the State Finance Committee elected to negotiate its summer 1983 bond sale, in lieu of a normal competitive offering. The objective of the negotiated sale would be to prove access to the market for the state and its municipalities and more importantly, to establish price benchmarks for subsequent state and local bond offerings. The access issue was vital because the state was simultaneously developing a $200 million revenue anticipation note (RAN's) issue for cash flow purposes. The RAN's were planned to be sold in August.

The month of July was spent waiting for the outcome of a signature count on an unsuccessful tax limitation initiative. A $149.9 million general obligation bond issue was priced during the week of August 7th with the pricing of the RAN's achieved during the week following. The outcome of the bond issue reasserted the state's presence in the bond market with a realistic, albeit higher, interest rate on the bonds than would have been expected after the preceding two bond sales. Relative to the *Bond Buyer* index, Washington's bonds were higher by 76 basis points. Subsequent sales in October 1983 (negotiated) and April 1984 (competitive) narrowed that spread to 27 basis points.

Litigation of another kind cast a cloud over the state's credit during the fall of 1983. In September, the U.S. District Court in Tacoma held that the State of Washington had discriminated and continued to discriminate against its women employees. *American Federation of State, County, and Municipal Employees (AFSCME), et al., v. State of Washington, et al.*, was initially believed to have a budgetary impact of almost $1 billion. In response to the court ruling, Standard & Poor's Corporation placed the state on Credit Watch in December 1983.

In January, the District Court denied certain of the plaintiff's request for damages (including interest on back pay). At the same time, the state appealed the case to the Federal Ninth Circuit Court of Appeals. According to the Office of Financial Management, the District Court rulings reduced the estimated cost of any judgment against the state to approximately $377 million.

Investor and rating agency concern regarding the comparable worth litigation became muted during the balance of the fiscal year. It became overshadowed by two tax limitation initiative signature campaigns during the spring. Standard and Poor's acknowledged that while still of concern, the length of the Federal appeal process and the reduced financial impact led them to eliminate comparable worth as a Credit Watch item.

During Fiscal 1984, the State Finance Committee (State Treasurer, Chairman; Governor and Lieutenant Governor, members) was again in the forefront of state activity in the credit markets, as the debt issuing authority for the State of Washington. Pursuant to RCW 39.42, all state bonds, notes, and other evidences of indebtedness are issued by the Committee. In execution of its statutory responsibilities, the Committee undertook the following financings or finance-related actions during the fiscal period.

$200,000,000 Revenue Anticipation Notes, Series 1983. During Fiscal 1982, a confluence of financial and economic problems necessitated the issuance of $400 million short-term certificates of indebtedness to bolster the deteriorating cash flow of the General Fund. Chief among these factors was the "25th month" accounting gimmick which caused a mismatch in the timing between expenditures and revenues in the beginning of each biennium.

Many valuable lessons were learned from the experience of Fiscal 1982. An interagency cash management team was established to monitor General Fund cash flow. Although the tax increases passed to balance the 1981-83 budget were bringing proportionately more revenue into the Treasury as the economy improved, it was recognized that the structural cause of the state's cash flow problems — the 25th month — would affect the first year of the 1983-85 biennium. As a result, the Finance Committee began the task of selecting a note underwriter and determining the size of the short-term borrowing in March 1983.

As stated above, the State Supreme Court decision on WPPSS 4 and 5 and the signature count on the unsuccessful Initiative 452, delayed the financing into August 1983. On August 16th, the State Finance Committee sold the state's $200 million notes to a syndicate headed by Merrill Lynch, Citibank, and Salomon Brothers at an effective rate of 7.66%. Rainier Bank formed a liquidity facility with six other local and national banks as insurance against possible cash deficiencies in the Treasury as a result of repayment of the notes. General Fund cash flow improved markedly over the term of the loan and the state had no cause to draw upon the facility. The notes were retired August 29, 1984.

General Obligation Bond Sales. During Fiscal 1984, the State Finance Committee entered the financial market three times with an aggregate total of $439,083,310 in State General Obligation and Motor Vehicle Fuel Tax General Obligation Bonds. The dates, purposes, par amounts, and rates are set forth below:

August 1983 Issue
Effective Rate: 10.709%

Outdoor Recreational Areas and Facilities, Series AI-4	$ 9,849,010
Handicapped Facilities, Series AI-4	4,000,000
Waste Disposal Facilities, 1980, Series AJ-5	15,000,000

State Fisheries Facilities, Series AX	1,165,000
Motor Vehicle Fuel Tax (Ferry Vessels), Series B-7	20,000,000
Total	$131,165,000

April 1984 Issue
Effective Rate: 10.349032%

Handicapped Facilities, Series AI-5	$ 5,000,000
Waste Disposal Facilities, Series AJ-6	35,000,000
Social & Health Services, Series AL-4	35,000,000
Higher Education, Series AQ-3A	6,000,000
Jail Improvement, Series AU-4	25,000,000
State Buildings & Facilities, Series AV-2	16,000,000
Waste Disposal Facilities, Series 0	5,000,000
Motor Vehicle Fuel Tax (County-City Urban Arterials), Series AI	6,000,000
Motor Vehicle Fuel Tax (State Highways), Series DD-4	25,000,000
Total	$158,000,000
Fiscal 1984—Total	$439,083,310

As of June 30, 1984, the total outstanding in bonded indebtedness of the State of Washington was $2,379,083,000. Of this amount, $1,707,043,000 were State General Obligation Bonds, $617,590,000 were Motor Vehicle Fuel Tax General Obligation and Revenue Bonds, and $54,450,000 were Limited Obligation Bonds. Total debt service (excluding amounts paid on certificates of indebtedness and bond anticipation notes) was $237,973,000 for Fiscal 1984.

III. STATE FINANCE COMMITTEE

Bond Debt Authorization

The 1984 Regular Legislative Session authorized an additional $76,320,000 in bonded debt for the State of Washington. These authorizations included:

Higher Education Capital Improvements. Ch. 264, Laws of 1984, authorized $8,670,000 in state general obligation bonds for improvements on the various Community College system campuses and for the University of Washington.

Common School Plant Facilities. Ch. 266, Laws of 1984, authorized $40,170,000 state general obligation bonds for the purpose of providing state matching funds for local school district building programs. The bond act provides that the general fund debt service on these bonds is reimbursed from interest earnings on the permanent common school fund. Under these provisions, the bonds will be excluded from the statutory debt limitation.

Department of Social & Health Services Capital Improvements. Ch. 269, Laws of 1984, authorized $14,660,000 state general obligation bonds for improvements at institutions managed by the Department of Social and Health Services. Among the projects for which the 1984 Legislature appropriated funds are Phase III renovation at Yakima Valley School ($6,031,500), improvements at the Child Study and Treatment Center ($245,000), and renovation of wards at Eastern and Western State Hospitals ($6,419,200).

Department of Corrections. Ch. 271, Laws of 1984, authorized $12,820,000 general obligation bonds for improvements at its various facilities and to acquire a passenger ferry boat to support its McNeil Island institution.

A New Fiscal Agency Relationship

As stated in the State Treasurer's Annual Financial Statement for Fiscal 1983, a fundamental change occurred in the municipal bond market beginning July 1, 1983. For the first time, states and municipalities were required by federal law to issue their bonds in registered form. Although the state's fiscal agency contract with Rainier National Bank was set to expire in May 1983, a six-month extension was negotiated, assigning the new duties of bond registrar and transfer agent to Rainier.

After January 1st, both the state and interested in-state banks believed the necessary experience relating to original issue of bonds, re-registration and transfer, and maintenance of bondholder accounts was available to develop workable bids. The state's request for proposals (RFP) distinguished between two tiers of indebtedness: the outstanding bearer (coupon) bonds issued prior to July 1, 1983; and the outstanding and projected-to-be-issued registered bonds issued after July 1, 1983.

Only two banks and their respective New York co-paying agents elected to respond to the state's RFP: Rainier National Bank with Chemical Bank; and Seattle-First National Bank with J. Henry Schroder Bank and Trust Company. Following reviews of the proposals and the credentials of the banks, the State Finance Committee awarded the four year appointment to Seattle-First National Bank and J. Henry Schroder Bank and Trust Company. Based upon uniform debt service float and certificate volume assumptions, Seattle-First's proposals produced a net benefit to the state of $750,000 more than Rainier's proposal. Central to this difference was a higher rebate to the state from invested cash balances and the absence of account maintenance charges from

State Bonds
Principal and Interest Paid
(In Millions)

Fiscal Year	Principal	Interest	Total
1984	$70.516	$167.457	$237.973
1983	$60.901	$133.881	$194.782
1982	$61.042	[1] $ 89.045	$150.087
1981	$54.630	$ 72.927	$127.557
1980	$52.160	$ 68.753	$120.913

[1] Includes payment made for defeasance of Outdoor Recreational Bonds, 1963, of $3.709 million on December 15, 1981.

the winning bid. The contract between the state and the banks was effective April 11, 1984.

Seattle-First and Schroder began phasing in the various registrar, transfer agent, and paying agent activities during April and May. The target date in assuming all fiscal agency duties was the June 1, 1984 payment date for all outstanding state and local bonds. Schroder Bank proved its capabilities with the registration and delivery to purchasers of the state's $158,000,000 general obligation bond issue on April 25th. Throughout this period the major workload element was the verification and conversion of records relating to an estimated $7 billion in bonds between Rainier and Seattle-First. During this difficult period, Rainier National Bank cooperated fully with the newly appointed fiscal agent, earning that bank's staff high marks for professionalism even in the face of the loss of the contract they had held since 1971.

Seattle-First and Schroder Bank have shown themselves to be worthy successors to Rainier Bank. Although the transition between the banks has, predictably, been difficult, the State's new fiscal agents have overcome the technical problems and are delivering a high quality of service.

Fiscal Agent Rebate

All municipalities that issue debt require a fiscal agent through which funds are transmitted by the public bodies to pay holders of their bonds and coupons. In this state, the State Finance Committee oversees the appointment of the state's fiscal agent. Through a competitive bid process, a fiscal agent is selected for four years to handle debt service payments for the state and its political subdivisions.

Since 1976, the state's fiscal agent, Rainier National Bank, Seattle (with Chemical Bank as co-paying agent in New York), has paid a rebate on a portion of their earnings from invested debt service funds. The State of Washington is believed to be the first state to have developed such a contractual relationship with its fiscal agent. Fiscal 1984 was the last year of Rainier's appointment. A new rebate plan with Seattle-First will be in effect in the ensuing fiscal year. During Fiscal 1984, over $413,000 was returned to the state and ninety-seven political subdivisions (state share: $139,005).

BOND DEBT GROWTH
Fiscal Years 1980-1984

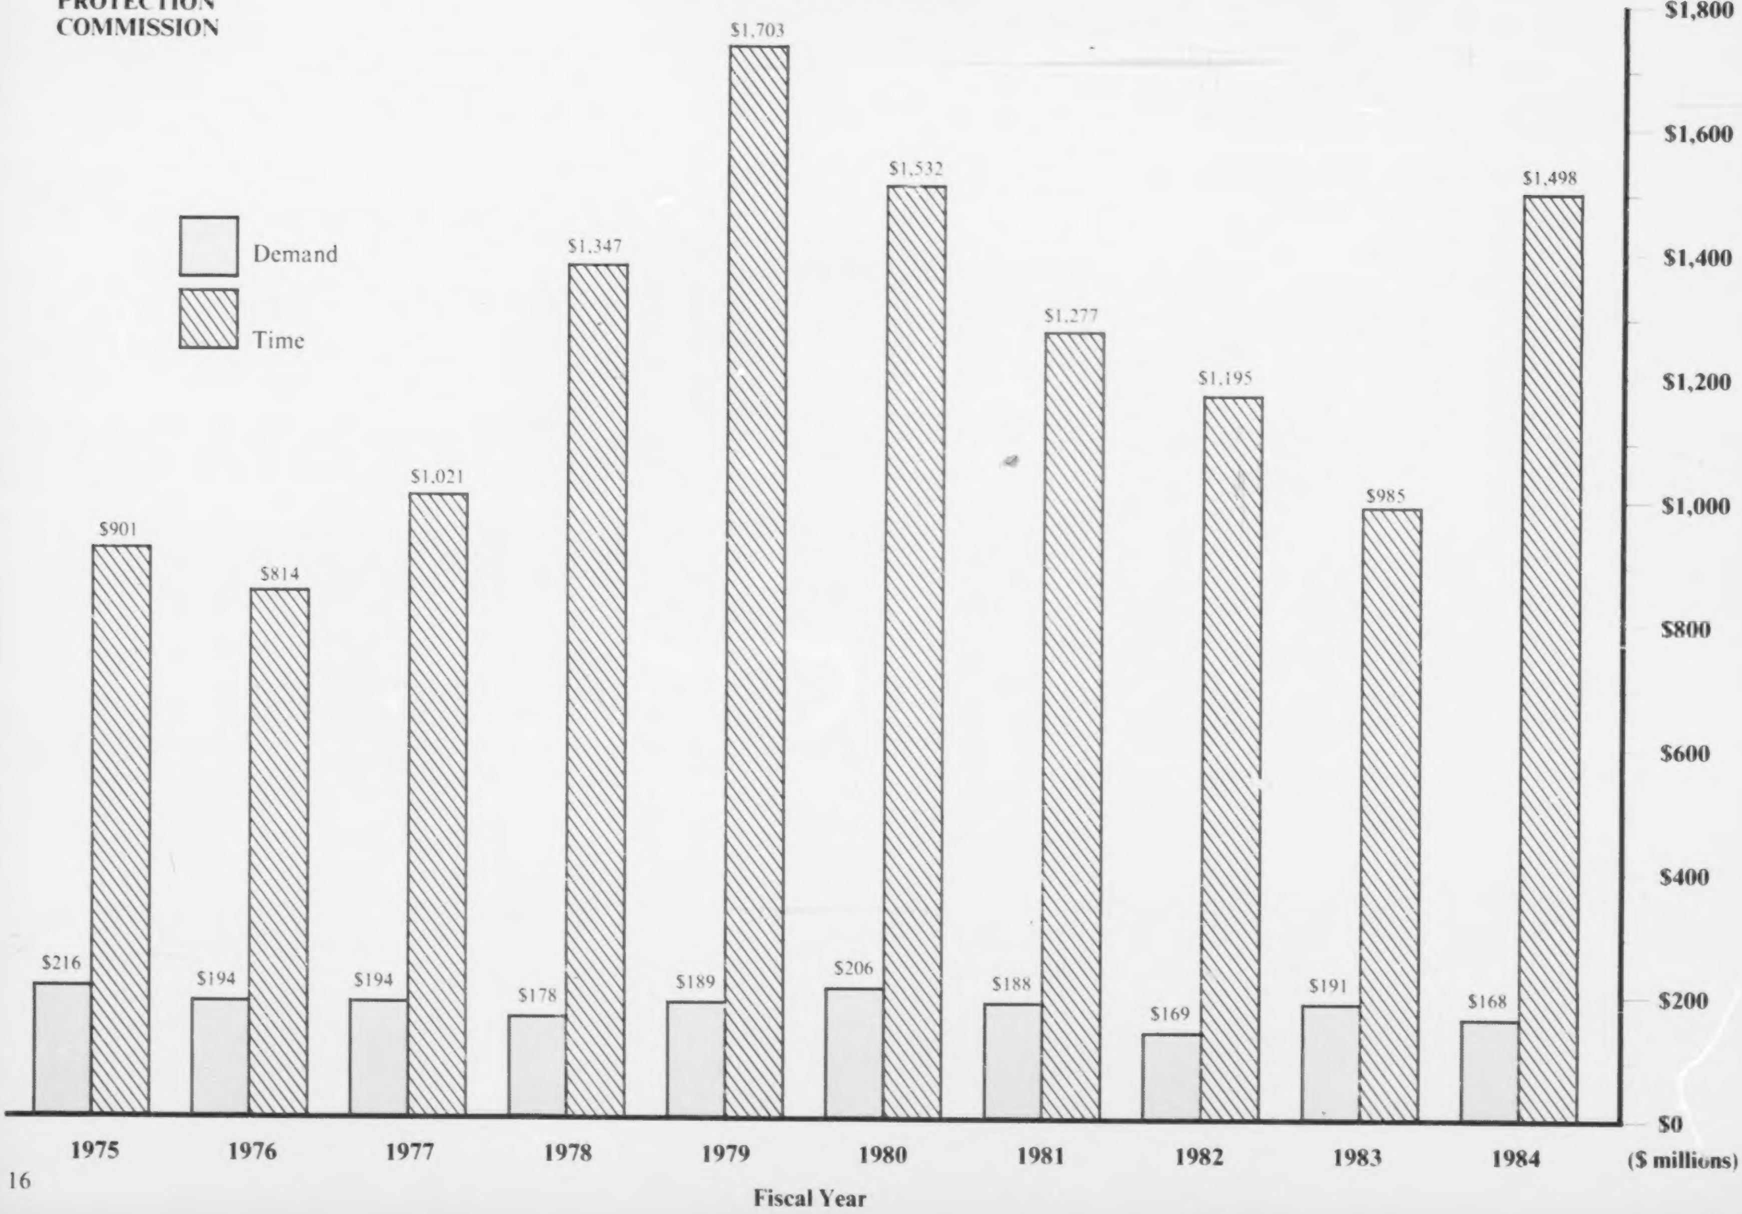
STATE-WIDE PUBLIC DEPOSIT ACTIVITY

DEMAND AND TIME DEPOSITS AS OF JUNE 30th FISCAL YEARS 1975-1984



IV. PUBLIC DEPOSIT PROTECTION COMMISSION

The 1969 Legislature created the Public Deposit Protection Commission, composed of the Governor, Lieutenant Governor, and the State Treasurer, as Chairman. With the passage of this Act, a new concept for collateralizing bank balances of public treasurers' accounts was adopted by the State of Washington. The administrative functions of the Commission were assigned to the State Treasurer's Office. Throughout the fifteen-year history of the pooled collateralization concept, there has been no instance in Washington State of any public depositary failing.

As administrator of the Public Deposit Protection Act, and in accordance with statutory provisions and the Washington Administrative Code, the office (a) monitors the financial stability of Washington-based financial institutions serving as public depositaries; (b) ensures that all requirements of the Act are being complied with by such depositaries; (c) notifies custodians of public funds at all levels of government of the Act's provisions (i.e., net worth data for qualified public depositaries and limitations relative to deposit levels); and (d) makes whatever recommendations are necessary to the Legislature to ensure the continued protection of all public funds on deposit.

Prior to the enactment of the Public Deposit Protection Act, each public treasurer (representing 265 cities and towns, 39 counties, and all other custodians of public funds) was required to execute a collateral agreement with every bank in which an account was held. To guarantee against loss, the bank, after allowance for FDIC insurance, was required to place in escrow securities having a value equal to 110 percent of each public treasurer's bank balance.

With the creation of the Public Deposit Protection Commission, a new concept was adopted based on the mutual responsibility of all banks for the failure of a single bank. The Commission was charged with the responsibility of arranging for collateral for all public deposits under the jurisdiction of state and local public fund custodians. The new procedure provides that in the event of default of any participating bank, the other member banks in the State of Washington will collectively assure that no loss of funds will be suffered by any custodian of public funds.

Each bank's collateral requirement of pledged securities was initially reduced from 110 percent to only 5 percent of the aggregate public treasurers' bank account balances. More recently, the 1977 Legislature increased the collateral requirement from 5 percent to 10 percent. In the event of a bank default, the Commission would establish the amount of public fund loss and assess each participating bank for its proportionate share, based on the ratio that its total public deposits bear to the statewide total.

The 1983 session of the Legislature expanded the Public Deposit Protection Act by allowing thrift institutions (mutual savings banks and savings and loan associations) to become qualified public depositaries. This amendment, which took effect July 24, 1983, created a collateral pool for thrift institutions, separate from that for commercial banks. Although the two collateral pools are separate, the procedures for each are the same.

The Legislature again amended the Act in 1984 (Chapter 177, Laws of 1984). The law now limits total public deposits in each public depositary to three hundred percent of its net worth or thirty percent of total public deposits statewide, whichever amount is less. A depositary may exceed these limits only by pledging one hundred percent collateral for the excess deposits. The statute was also amended to allow a public treasurer, under certain conditions, to maintain deposits in excess of a depositary's net worth providing the depositary pledges collateral in an amount equal to one hundred percent of the excess deposits.

These statutory changes provide increased flexibility to Washington's public treasurers while also providing maximum protection of deposits. At the same time, a larger segment of the state's financial community is able to participate in the public funds market.

The administration of this pooled collateral program requires quarterly reports from all commercial banks and thrift institutions serving as qualified public depositaries, maintenance of trust agreements with third-party financial institutions, and communication with over 800 local treasurers and other custodians of public funds regarding deposit limitations and other matters relative to the provisions of the Act. The accompanying chart compares public deposit activity for the past ten fiscal years.

V. THE WASHINGTON ECONOMY

Fiscal 1984 was a year of solid recovery for the Washington economy after two years of recession. Nonagricultural employment reached 1,622,100 jobs in the last quarter of the fiscal year, equalling the previous record, and 3.1 percent above the final quarter of Fiscal 1983. Nearly all sectors of the economy improved during the year. Manufacturing employment increased by 7,200 jobs when comparing the last quarters of Fiscal 1983 and 1984. Substantial increases occurred in pulp and paper, apparel, printing, chemicals, metals, and in the high-tech machinery sectors. There was a decline in aerospace employment during the first two quarters of the year, but this was nearly offset by gains in the last two quarters. Year over year employment was also higher in all nonmanufacturing sectors. The largest gains were in the retail trade and services sectors, where a total of more than 25,000 jobs were added.

The growth of the state's economy was also apparent in the growth rate of real personal income. Real personal income in Fiscal 1984 was 2.9 percent higher than in 1983. Real per capita personal income increased in Fiscal 1984, after falling in the three previous years.

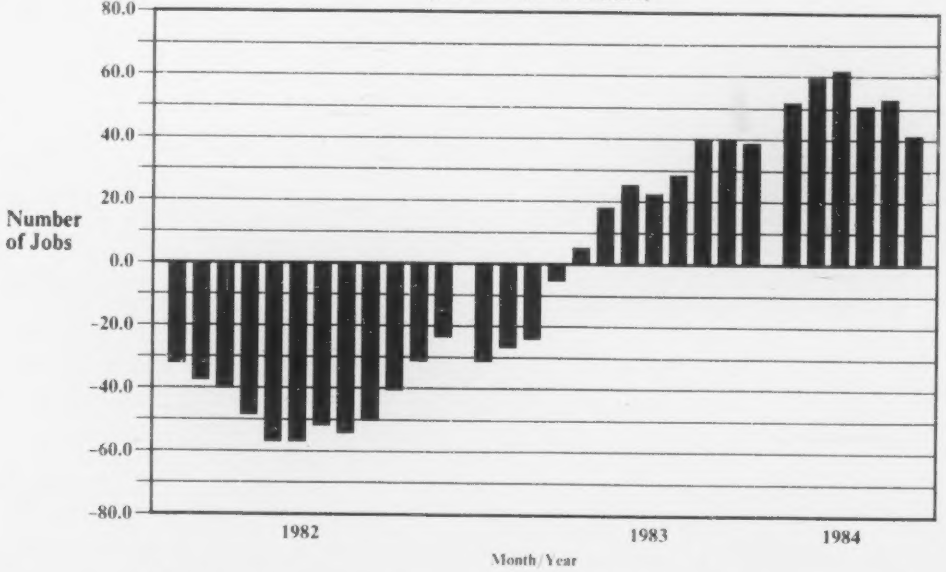
According to the official population estimates prepared by the state Office of Financial Management, Washington's population grew 1.0 percent to 4,328,100 between April 1, 1983 and April 1, 1984. Net out migration from the state, which had occurred during the recessionary years of 1982 and 1983, is believed to have ended. With Washington's economic recovery well underway, more people are once again moving into the state than are moving out.

Because of the expanding economy and slightly lower interest rates, there was also an increased level of housing activity in the state in Fiscal 1984. Through the first three quarters of the fiscal year, the number of housing units authorized by permit was 27,449 at an annual rate, compared to 23,496 for 1983.

The outlook is for the current expansion of the Washington economy to continue through Fiscal 1985, the second year of biennium. Unemployment, which was 10.8 percent in June, 1983, had fallen to 9.3 percent by June, 1984 and should continue to drop. The turnaround in aerospace employment which began midway through Fiscal 1984 is probably the most significant local factor affecting the state's economy. The Boeing Company has announced that its employment is expected to increase by 5,300 to about 67,000 by December, 1984. With the national economy continuing to move ahead, the outlook for Washington is optimistic for the rest of this biennium.

Employment Growth

(Year Over Year—In Thousands)



The graph shows year over year changes in Washington nonagricultural employment. For example, May 1984 employment is more than 53,000 higher than in May 1983.

	TOTALS	$ 842,936,326.95	$ 58,012,279.46
	Total Deposit Interest Account (80%)		$ 58,012,279.46*
	Total Deposited Directly to General Fund (20%)		14,540,447.34
	TOTAL EARNINGS RECEIVED FOR FISCAL YEAR 1984		$ 72,552,726.80

*Overall earnings credited to the Deposit Interest Account during Fiscal 1984 were $58,161,789.20. Of this amount, $154,509.74 was refunded to a nontreasury trust fund and a local fund in two separate transactions. These two transactions were necessary to reverse erroneous deposit transactions to the General Fund. In addition, $5,000.00 was added, which resulted from earnings received after the Fiscal 1983 deposit interest distribution. Thus, the net earnings available for distribution for Fiscal 1984 were $58,012,279.46.

EARNINGS ON CURRENT INVESTMENTS OF CASH BALANCES IN STATE TREASURER'S TRUST FUND

FISCAL YEAR 1984

EXPLANATION OF TERMS USED IN REPORT

Fund Accounting

In governmental accounting a "fund" is defined as an independent fiscal and accounting entity which encompasses a sum of money or other resources set aside for the purposes of carrying on specific activity or attaining certain objectives in accordance with special regulations, restrictions, or limitations. The assets of the fund may be used only for the particular purposes for which the fund was created.

Terminology

Treasury Fund — a fund in the State Treasury held by the State Treasurer.

Receipts — amounts received in a state fund from taxes and other sources.

Issues (Disbursements) — amount of cash or other resources to be paid for a service rendered or asset purchased through issuance of a state warrant.

Transfer — an accounting adjustment between agencies, funds, and/or source of funds.

Outstanding Warrants — state warrants that have been issued but have not been returned to the Treasurer's Office for payment (redemption).

Cash Balance — resources available for temporary investment over and above current liabilities.

Fund Classifications

General Fund — accounts for all revenues and expenditures of the state which are not accounted for in other funds by law or contractual agreement and supports the general operations of the state. It is the largest and most important accounting activity of state government.

General Fund Accounts (Restricted) — established by law as separate accounts within the General Fund.

Special Revenue Funds — used to finance particular activities from the receipts of special taxes or other revenues.

Debt Service Funds — used to account for the accumulation of resources for, and the payment of, long-term debt principal and interest.

Enterprise Funds — used to account for self-supporting, state-owned operations which render services primarily to the general public.

Internal Service Funds — established to account for the financing of activities performed by one state unit for another state unit on a cost-reimbursement basis.

Expendable Trust Funds — used to account for the activities of a Trust Fund held by the state whose resources, including both principal and income, may be expended.

Nonexpendable Trust Funds — used to account for the activities of a Trust Fund held by the state whose entire principal must remain intact but whose income may be spent in accordance with the trust agreement.

Pension Trust Funds — used to account for assets received from general revenues, contributions, interest dividends and the disbursement of these assets as benefit payments to retired employees or their beneficiaries.

Agency Funds — used to account for assets held briefly by the state as an agent for individuals, private organizations, other governments and/or other funds.
